## Subarray v/s Subsequence

## Subarray

Subarray is a continuous part of the array.

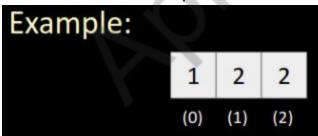

Note: Number of subarrays of an array with n elements =  ${}^{n}C_{2} + n = n*(n+1) / 2$ .

## Subsequence

A subsequence is a sequence that can be derived from an array by selecting zero or more elements, without changing the order of the remaining elements.

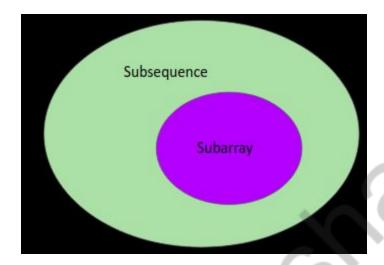

Note: Number of subsequences of an array with n elements =  $2^n$ .

Subsequences of the above array are: {}, {1}, {2}, {2}, {1,2}, {1,2}, {2,2}, {1,2,2}.

Apni Kaksha

**Remember**: Every subarray is a subsequence but every subsequence is not a subarray.
